## Coming home to Wells Glass.

When it comes to home glazing Wells Glass does it all and we do it by going above and beyond your expectations. And that service doesn't stop when the jobs finished either. We're at hand for the lifetime of your product, whether it's a repair to a pane or installing your personally designed stained glass windows. And with same day repairs as well, we're only too happy to help.

Not only that, but we make sure you get the right price, the right product and the best design for your home, using the highest quality materials and latest technologies. You can also be sure of the finished result, because when it comes to the construction process, all of our trusted fitting and building crews are carefully selected and highly trained.

For any installation, we start with an initial visit to your home. And as a family business we know what home means to you, because we take great care that whatever your choice is, it's one you have to live with. From that moment on you can be rest assured that everything will be carefully explained and you're in complete control from beginning to end.

## Windows

Our large range of windows and doors are always made to specification from the highest quality materials to ensure they function efficiently for your lifetime. From uPVC, Treated Wood or Metal, grade II listed, or ultra modern seamless windows, we can provide your home just what it needs for warmth, comfort and security.

With a wide range of glazing skills, with our traditional or bespoke service, we will give you the ability to enhance your homes features whilst improving the technology of energy efficient glass and the very latest in security systems. Not only will you save money from your energy bills, you'll gain peace of mind knowing your family is safe and secure.

## Doors

A door is more than just securing your family from the outside world, it's the entrance to your world. Wells Glass can provide you with one of the best ranges of uPVC, plastic powdered coated aluminium, in a range of colours and bespoke joinery. We also provide composite doors that combine classical, modern or technologically state of the art finishes and security.

- **Door security options include:** Inbuilt 'anti-jacking' system; Dead-bolt; Five-lever mortice deadlock conforming to BS 3621; Key-operated multi-point locking system and Rim automatic deadlatch with key-locking handle.
- **uPVC doors** are now available in black, white, mahogany, grey and cream, multiple colour outside/inside. Their benefits include: Added extra security; cost effective; reduce outside noise; require very little maintenance and are energy efficient.
- **Aluminium doors** Aluminium doors offer strength, durability and are highly resistant to corrosion. The natural strength of aluminium gives you slim-lines, less frame and more glass. Aluminium doors are maintenance free and built to last, with the life span of aluminium being measured in decades rather than years. Aluminium is very sustainable, endlessly recyclable and very environmentally friendly. Over 200 different RAL colours and you can even have different colours inside and out.
- **Composite doors** are incredibly strong and secure and unlike uPVC doors, can be designed to be aesthetically pleasing. This means that you do not have to compromise on style for the sake of practicality. Composite doors require almost no maintenance and unlike wooden doors, do not need regular painting and varnishing. Our range of composite doors, are solid framed and 1.7 inches thick making them energy efficient. Our composite doors are also energy rated making our doors thermally efficient to keep heat in your home.

**Energy Saving**  
Building Regulations

**Ultralite Double Glazing**  
Super thin double glazing

**Triple Glazing**  
External/Internal Control

**Thermoset polymers**  
Non conductive spacers

## Understanding energy ratings – the science bit.

These days, energy conservation is increasingly high on the agenda. Our products are 'A' rated energy efficient, providing optimal double-glazed insulation. When the weather turns cold, our windows and doors will cut out draughts and minimise heat loss. By retaining the heat generated, you will save money on fuel bills and stay warmer.

At Wells Glass we use Planitherm. The most efficient type of glass available on the market today. It's a glass that literally adds heat to your home with no heat loss through the windows. And with a staggering 26% of all domestic heat loss escapes through the windows. Installing energy efficient windows can save you up to 28% per year on your heating bills compared to traditional windows and frames.

Research has shown that many homeowners assume that all double glazing is equally energy efficient. In fact, there are huge differences in performance and it is the glass that makes the difference.

**Free Solar Heat Gain** is an advanced coating technology to capture energy from natural daylight to help heat the home

**Thermal Insulation** is an advanced coating that reflects heat back into the room, meaning less energy is needed to heat the home to the desired temperature.

**Optimal Energy Ratings** combines with virtually any window frame to achieve a Window Energy Rating (WER) of C and an A rating is easier to achieve.

**Haze & Tint Free Windows** maximise the amount of natural light into the home, without the haze or tint effects associated with some older double glazed windows.

**Eliminates Condensation** and reduce draughts and cold spots in and around windows.

**Glass Cut to size**  
On the spot service

**Stained glass windows**  
Repair or replacement

**Mirrors**  
Made to measure

**Double glazing units**  
Same day service

## Glass and Glazing shop

At Wells Glass we know that when you need something fixed, it's normally required to be done urgently. With our same day service, we are perfectly disposed at our shop workshop to undertake same traditional glazing works and modern unit builds. So, whether your trade or house owner you can be sure to get what you need, when you need it.

### Our list of services include:

- Glass cut to size while you wait
- Stained glass windows and leaded lights made to order
- Mirrors made to measure
- Double glazing units made to order\*
- All parts for double glazed windows
- Sand blasted glass, Antique, Victoriana glass in stock
- Full range of all types of glass
- Glass splashbacks for your kitchen
- Safety glass cut whilst you wait
- Safety and solar films
- Full range of Silicones, putties & mastics
- A selection of framed mirrors
- uPVC display of various assembled units in shop
- Car mirrors

\* Double glazing units need to be booked in before mid-day for a same day service.

## Secondary Glazing

Secondary glazing is ideal for buildings of every period where, windows require regular ventilation. Casement windows but can be used for many other styles that make secondary glazing an ideal economic solution to reducing noise and heating bills.

Horizontal slider systems and vertical systems are:

- **Easy Cleaning** with windows simply lift out for easy cleaning and storage - it could not be simpler. Suitable for Georgian, Victorian and Edwardian vertical sash windows.
- **Substantial energy** savings are achieved and overall efficiency can be doubled by improving the heat-loss coefficients.
- **Noise reduction** that is typically more than twice as effective as double glazing. With an air-gap of only 40mm and using 4mm toughened glass noise was reduced by 40dBA while retaining normal working of existing internal shutter.
- **Ultra-thin lightweight framework** means that its visibility is kept to an absolute minimum.

Vertical secondary glazing can be mounted within the 'staff beads' of a vertical sliding sash window, allowing the lower panel to be opened and enabling the retention of working internal shutters. This is an important priority when satisfying the needs of Conservation Officers.

## Buy with confidence

Our approach is completely different. Each property is different and there are many opportunities on each house to change, improve or carefully reproduce the existing character.

Wells Glass is driven by skilled, experienced and highly trained glazers. And with so many different windows and doors, no installation is ever the same. Whether Aluminium, uPVC or timber windows we offer at least 4 different frame options for each material, different frame thicknesses and profile shapes to suit personal taste, budget and character of property.

Firstly we will have a brief consultation that will last as long as you want it to. We will visit your property & discuss with you the alternatives that will be suitable for your home and your budget. At this stage we can give an indication of costs but will need to spend time after preparing an accurate assessment with full breakdown of costs giving you visibility and control.

## Survey

This is a most vital part of your project and often underestimated in our industry. A precision survey means that the installers enjoy their work, the windows and doors are exactly the right size to suit your brick openings, minimal sealants and trims, giving you the perfect finish to your replacement windows, doors and conservatories. Surveyed by the installer doing the work, so you can feel at ease knowing you have for complete control and a we don't sub-contract.

## Installation

We understand that having done all the preparation, the installation, finishing detail and completion of your project is the most important stage of all. This will be taken care of by one of our own teams of highly trained and highly experienced craftsmen.

## After Sales Service

This is the area that most window companies are the least enthusiastic about. You have paid your bill and they are onto chasing new work. The reason we are growing from strength to strength after 34 years is that we look after our customers. More than 50% of our work comes from people recommending us or returning for additional work.

We have records of every single window and door that we have ever installed dating right back to 1978, ensuring that we are ready and organized to identify, replace or repair any item. We have traded without a break or name change for 34 years.

We guarantee that you should you entrust us with your project, you will be delighted with every aspect of the process, we look forward to being of service to you.

Click on offer for more information, or pop in to the shop.

## Energy saving

The thermal insulation provided by low-E double glazing is three times more efficient than that of standard double glazing and PLANITHERM products are the ideal low-e solution to meeting and exceeding the newly revised Building Regulations energy efficiency requirements.

Our products use a special coating to reflect heat from domestic heat sources back into the room, rather than allowing it to escape through the windows. At the same time, this coating allows free heat and light from the sun to pass through the glass, warming the room and further contributing to the energy efficiency of the windows and helping to reduce your energy bills.

<small>This label is not a statutory requirement. It is a voluntary label provided as a customer service to allow consumers to make informed decisions on the energy performance of competing products.</small>	

Our range can be combined with many other Glass products, providing a multitude of high performance, multi-functional glazing options, including:

- Self-cleaning and/or solar control glazing
- Acoustic insulation
- Safety and security
- Obscured and/or decorative glazing

This combination of excellent thermal insulation with high solar heat gain makes for the most energy efficient window glass available and the best possible choice for energy savings.

### Energy Saving Trust

Energy Saving Trust Recommended is a product certification and labelling scheme that highlights products that are amongst the most energy efficient on the market and will help consumers to save energy in the home.

With more than 18 years' experience in advising consumers about energy efficiency, the Energy Saving Trust is nationally renowned for its expertise in this field.

Windows with a B rating or higher are eligible to be certified by the Energy Saving Trust Recommended scheme and to use the Energy Saving Trust Recommended label (subject to approval).

High performance energy saving glass products such as Planitherm are recognised as being an essential component in improving the energy efficiency of windows and can help windows to qualify for Energy Saving Trust Recommended status.

For further information on the Energy Saving Trust please click here <http://www.energysavingtrust.org.uk>

## PRIVACY POLICY

This privacy policy is about the way information collected is used. No personal information is collected however information is collected about how users access and use this website.

### 1.The information collected and used

If you use this website, you are in control of what information is collected, but if you choose not to share your information, you may not be able to access or use some areas of this website.

#### 1a.How information is collected

This information may be collected, stored and used when you use this website and when you call the Advertiser.

#### 1b.What information is collected

The information collected and held may include but is not limited to:

information about your computer and about your visits to, and use of, the website (including your IP address, approximate geographical location, browser type, referral source, length of visit and number of page views);

if you call the Advertiser, your phone and/or mobile phone number and the time, date and day of the week and length of your call; and any other information you may provide to the provider of this site.

##### 1c.Using cookies or other on-device storage

Cookies are information files stored on your computer, tablet or smartphone that help websites remember who you are and information about your visit. For further information (including how to opt out of cookies) please go to the Cookie Policy.

### 2.How information collected is used

#### 2a.When you use this website

When you use this website, information is collected. It will be used for the purposes set out in this privacy policy.

#### 2b.Customisation of this website and advert targeting

The information collected when you use this website may be used to build up a picture of your interests. This information may be used to try to make sure that when you visit or use the website, you don't miss offers and information that might interest you. This is called advert targeting.

#### 2c.Tracking how the website is used

Information may be collected about activity on the website, or other organisations may be used to collect it and to share it. This information is used to:

analyse statistics;

track pages and paths used by visitors to, or users of, the website;

target the adverts or offers, such as banners, on the website and on the websites of other organisations; and track the use of the internet banner adverts and other links from marketing partners' websites to this website.

For these purposes, the information on the path you take to get to the website and on some of the pages you visit or use through the website, using cookies, web beacons and other on-device storage will be retained. For information about web beacons, or the organisation used (including how to decline their cookies), please go to the Cookie Policy.

#### 2d.Analysing call volumes

If you call the Advertiser using the number featured on the website, we may record your phone number, the time, date, day of the week and length of the call and certain details about whether the call was answered or not. This information will be shared with the Advertiser and used to analyse the effectiveness of the website.

### 3.Disclosure of your information

Your information may be passed to one or more of the following organisations:

the Advertiser;

data processing companies, mailing houses and other third party suppliers; and government and enforcement agencies and the police.

Occasionally, this may involve sending your information outside the European Economic Area. For more information, please read section 4 - Where your information is processed.

Every now and again, requests are received for information from government departments, the police and other enforcement agencies. If this happens, and there is a proper legal basis for providing your information, it will be provided to the organisation asking for it.

### 4.Where your information is processed

When your information is used as described in section 2 - How information collected is used, this may occasionally involve sending your information outside the European Economic Area (EEA). Where this is done, appropriate steps are taken to protect your information. By using this website, you agree that your information may be transferred, stored and processed outside the EEA.

### 5.How your information is kept secure

The security of information is taken very seriously. Technology and security policies are in place to protect the information held.

### 6.How changes to this privacy policy may occur

This privacy policy may be updated from time to time so you may want to check it each time you visit the website.
